

ELECTRIC DETECTIVE

Grab a parent or guardian and go on a home adventure! Look around your house and see what you can discover about electricity.

Check off what you find:

- I found _____ outlets in one room
- I counted _____ things plugged in
- I found a light switch in a room
- The biggest thing that uses electricity in my house is:

- I found something that keeps food cold (like a fridge)
- I found something that makes air move (like a fan)
- I found a night light or something small that uses electricity
- I found something that works when the power is out (like a flashlight)
- I found the electric meter on my house
- I found an outdoor light or outlet
- I found an electric cord in good shape (no cracks or breaks)
- I found something that needed to be unplugged like a charger that wasn't charging anything and unplugged it with an adult's help!

AMPED UP CHALLENGE | Did you find things plugged in or lights left on? Turn them off (with an adult) to help save energy!
